Summary

Senior Mobile Engineer with 4 years of experience building production-grade iOS and Android applications using React Native, Expo, and TypeScript. Experienced architecting AI-powered products, VoIP platforms, real-time communication systems, and scalable backend services with Supabase/Convex. Passionate about owning products end-to-end from architecture, development to deployment, App Store and Google Play releases.

Work History

Navis One Lab LLC | Lead Full Stack Mobile App Developer (Expo + Supabase) | Jun 2025 – Jun 2026

Built and shipped production-grade cross-platform mobile applications for global clients focusing on AI-powered communication, telephony automation, real-time messaging, backend architecture, third-party integrations, production debugging, feature planning, system design, and production-ready mobile products.

- Developed in/out bound calling, SMS, WhatsApp integration, call history, contact management, and real-time communication workflows.
- Integrated AI voice agents for auto-answering calls, managing customer conversations, and routing responses through business logic.
- Architected backend services with Supabase, PostgreSQL, RLS, Edge Functions, Storage, RL subscriptions, and third-party APIs.
- Designed scalable mobile architectures for production applications used by global clients. Client dashboards, API integrations, production debugging, feature planning, system design, and post-launch support.

Tech: Expo, TypeScript, Supabase, PostgreSQL, Twilio, ElevenLabs, WhatsApp API, SMS APIs, Telephony APIs, AI Voice Agents, REST APIs, EAS Build, Expo Router, Deep Linking, OTA Updates, Background Tasks, Analytics, Crash Reporting, CI/CD, Feature Flags.

Upwork | Mobile App Developer (React Native + Expo) | Part-Time | "Click to open"

Delivered custom cross-platform mobile applications for clients across the globe using React Native and Expo. Focused on building responsive, performant mobile experiences while supporting clients through feature planning, implementation, debugging, and post-launch maintenance.

- Built and delivered multiple custom mobile apps for international clients.
- Developed responsive cross-platform UI with optimized performance across Android and iOS.
- Implemented new features, fixed production issues, and improved app stability.
- Collaborated directly with clients on architecture decisions, feature planning, and long-term maintenance.
- Maintained a freelance profile for client acquisition and project delivery.

Tech: React Native, Expo, TypeScript, JavaScript, REST APIs, Push Notifications, Firebase/Supabase, Git, EAS Build, Android, iOS.

Netmark | Mobile App Developer (React Native + Ionic) | Jun 2024 – May 2025

Led the development of mobile applications for service-based businesses using React Native and Ionic. Worked on both new applications and existing codebases, focusing on scalable architecture, performance optimization, and smooth user experience.

- Architected mobile applications from scratch based on business requirements.
- Maintained and improved existing React Native and Ionic codebases.
- Optimized app performance, responsiveness, and scalability.
- Built user-friendly mobile workflows for service-based businesses.
- Collaborated with cross-functional teams to align technical solutions with business goals.

Tech: React Native, Ionic, TypeScript, JavaScript, REST APIs, Mobile UI/UX, State Management, Git, Android, iOS.

Softtech | Mobile App Developer (React Native) | 2023 – Mar 2024

Customized and enhanced pre-built B2B and B2C mobile applications using React Native. Focused on implementing new features, improving app performance, and maintaining consistent user experiences across Android and iOS.

- Customized pre-built B2B and B2C mobile apps based on client and business requirements.
- Implemented new features and improved existing app functionality.
- Optimized app load time, responsiveness, and runtime performance.
- Maintained consistent UI/UX across Android and iOS platforms.
- Fixed bugs and supported ongoing app improvements.

Tech: React Native, JavaScript, TypeScript, REST APIs, Mobile UI/UX, Performance Optimization, Git, Android, iOS.

AlgoSolver LLC | Web & Mobile App Developer (Next.js & React Native) | Sep 2021 – Jan 2023

Developed front-end features for web applications using React and Next.js while also building mobile app features with React Native. Worked closely with design and backend teams to deliver scalable, modular, and performance-focused product features.

- Developed front-end features for web applications using React and Next.js.
- Built mobile app features using React Native with attention to design quality and performance.
- Created reusable, modular components for web and mobile interfaces.
- Collaborated with design and backend teams to deliver production-ready features.
- Improved frontend maintainability, responsiveness, and user experience.

Tech: React, Next.js, React Native, JavaScript, TypeScript, REST APIs, Frontend Architecture, Responsive UI, Git, Android, iOS.

Technical Skills

Mobile:	React Native, Expo, TypeScript, SwiftUI (basic), Native Modules, Reanimated, Gesture Handler, Skia State Management & Query: Redux, Zustand, Jotai, Recoil, Atom, React Query, SWR, Axios, GraphQL Forms & Validation: React Hook Form, Zod, Yup UI & Styling: NativeWind, Tamagui, ShadCN, Radix UI, Stylesheet Communication: Twilio, CallKit, PushKit, VoIP, WebRTC, ActivityKit Native (iOS & Android): WidgetKit, App Widgets, App Intents, HealthKit, Health Connect, ActivityKit (Live Activities), CoreML, MediaPipe, Object Segmentation, Core Bluetooth.
Back-End:	Supabase, Convex, Firebase, Node.js, Express.js, NestJS, PostgreSQL, MongoDB, Prisma, TypeORM, Drizzle
Web:	React.js, Next.js, Material UI, Ant Design, Headless UI, Mantine, Framer Motion, Three.js
Dev Tools:	Git, Cursor, Claude Code, Xcode, Android Studio, Figma, Postman, Jira, Notion, Slack, ChatGPT, App Store Connect, Play store, App store
AI:	OpenAI, Claude, Gemini, Grok, Codex, Cursor, ElevenLabs, Whisper, CoreML, Vision, LLM Integration, AI Voice, AI Notes, AI Speech, LLM Apps, AI Face Scanner

Projects:

Ringo: Business Phone	App Link - App Store Web Overview: Ringo is an AI-powered business phone for small businesses and teams. Get a dedicated business number, manage customer calls, SMS, and WhatsApp in one shared inbox, collaborate with teammates, record calls, view transcripts and AI summaries, draft smarter replies, translate conversations, and let an AI call assistant answer when your team is unavailable. Technologies: Expo, React Native, TypeScript, Expo Router, Zustand, TanStack Query, Supabase, Twilio Voice, WhatsApp Business, ElevenLabs, LiveKit, Stripe, RevenueCat, NativeWind, MMKV, PostHog, Crisp. Role: Led end-to-end mobile development, backend architecture, native integrations, real-time communication, and App Store releases.
DevPartner: Meeting	App Link - App Store Web Overview: DevPartner is an AI-powered meeting notes and productivity app that records meetings, transcribes conversations, generates structured summaries, extracts action items, and turns follow-ups into tasks. It helps founders, builders, teams, and busy professionals stay organized with AI chat, voice capture, reminders, calendar context, widgets, Live Activities, and connected workflows for meetings, notes, ideas, and daily planning. Technologies: Expo, Convex, native modules, iOS widgets, Live Activities, App Intents, Reanimated, Skia
Smart Tax UK	App Link - App Store Play Store Web Overview: Accurately calculate UK Corporation, Income, and Payroll taxes. View detailed tax info and graphs. Fast, simple, and reliable tax insights.UK Tax Calculator is your all-in-one solution for calculating UK taxes with ease and accuracy Technologies: Expo, TypeScript, Zustand, Supabase.
Hayrly	App Link - App Store Play Store Overview: Hayrly is a minimalist social and mood-tracking app designed to help you stay connected with your closest friends and family. Track your mood and effortlessly see how your loved ones are doing. Technologies: Expo, TypeScript, Zustand, Atom, Supabase.
Sales Drive	App Link - App Store Play Store Overview: Sales Drive is a dynamic digital platform designed to enhance communication between brands and their employees and ignite the education process for sales representatives and managers to boost sales. Technologies: React Native CLI, TypeScript, React Query, React Navigation.
Fixbil	App Link - App Store Play Store Overview: Fixbil is a multi-language mobile app that helps car owners book car repair services at car workshops and share and transfer cars to other users. Technologies: React Native CLI, TypeScript, React Query, React Navigation, Native Base.
Chitti	App Link - App Store Play Store Overview: Chitthi empowers users to create and manage issue, receipt, and Bhav-cut invoices, receipt invoices, and bhav-cut invoices. Additionally, it provides a comprehensive total balance dashboard for a complete financial overview. Technologies: Expo, Eas, TypeScript, Axios, Redux.
Mangalmani	App Link - App Store Play Store Overview: Mangal Mani is a jewelry app offering a curated collection of exquisite designs inspired by the 7 wonders of the world. It provides a seamless shopping experience with unique collections, exclusive craftsmanship, and a story behind every piece. Technologies: Expo, Eas, TypeScript, Axios, Redux.
Gorenje Expert	(Mobile App) App Link - App Store Play Store Overview: Gorenje Expert helps to trains the members through training programs and registers daily sales activity, gaining points and earning rewards by overall activity.. Technologies: React Native CLI, React Navigation, Redux.

Education & Certifications :

2025	BFDS Certificate Of Membership ICT Division, Bangladesh Government
2019 – 2024	Bachelor of Science in Computer Science Premier University, Chittagong
2017 – 2019	Higher Secondary School Certificate (HSC) Government City College, Chittagong Mobile & Web App Development Certifications Programming with Mosh, Programming Hero, Udemy, and self-taught expertise

Achievements:

- Published 20+ production mobile applications
- Built AI-powered voice, vision, and automation products
- Built enterprise VoIP platform using Twilio, CallKit & PushKit
- Architected Supabase & Convex backends with real-time infrastructure
- Worked with clients across 10+ countries
- Upwork Top Rated (100% Job Success)
